## Changsheng 2.2KW (Φ 80\*213) Water-cooled Spindle

### Motor for Woodworking Advertising

 	<b>model:</b>	GDZ-80-2.2B
	<b>Dimensions:</b>	Φ 80*213 Φ m/m
	<b>Rotating speed:</b>	24000RPM
	<b>power:</b>	2.2KW
	<b>Voltage:</b>	220V/380V
	<b>frequency:</b>	400HZ
	<b>Bearing:</b>	3 bearings
	<b>cooling method:</b>	Water cooling
	<b>Chuck nut:</b>	ER20
	<b>Spindle Current:</b>	/

1. This water-cooled spindle motor should be used with the inverter, and the specifications of the inverter should match the related specifications of the spindle motor. If the settings are not matched, the spindle motor will get burned.
2. Before the use of the water-cooled motor, buyers should ensure that the cooling circulation system of the motor is working normally, and it is strictly prohibited to use the [CNC spindle motor](#) without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing may change. It will be better if customers can run this spindle at a low speed before use.
