## Hongyang 2.2KW Woodworking Advertising Water-cooled Blue Cover Spindle Motor

 	<b>model:</b>	80*24R/2.2F
	<b>Dimensions:</b>	Φ80*230Φm/m
	<b>Rotating speed:</b>	24000RPM
	<b>power:</b>	2.2KW
	<b>Voltage:</b>	220V/380V
	<b>frequency:</b>	400HZ
	<b>Bearing:</b>	Four bearings
	<b>cooling method:</b>	Fan cooling
	<b>Chuck nut:</b>	ER20
	<b>Current:</b>	/

1. This water-cooled spindle motor should be used with the inverter that holds the matched parameters with itself. If the settings are incorrect, the [water cooled spindle motor](#) will be burned.
2. Before using, the water-cooled spindle motor must ensure that the cooling circulation system is working normally, and it is strictly prohibited to use the spindle without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Thus, it is better for customers to run the spindle motor at a low speed before use.
