

JINAN HONGYANG CNC MACHINERY CO., LTD

HQD 3.2KW Double Head Woodworking Advertising Water-Cooled Spindle Motor

 <p>弘阳数控® HONGYANG CNC</p>	Model:	GDZ-24Z-1
	Dimensions:	Φ100*255ΦM/M
	Rotating Speed:	24000RPM
	Power:	3.2KW
	Voltage:	220V/380V
	Frequency:	400HZ
	Bearing:	FOUR BEARINGS
	Cooling Method:	WATER COOLING
	Chuck Nut:	ER20
	Current:	/

1. The water-cooled spindle motor should be used with the inverter. The specifications and parameters of the inverter should match the rated parameters of the spindle motor. If the settings are incorrect, the spindle motor will be burned.
2. Before use, the water-cooled spindle motor must ensure that its cooling circulation system can work normally, and it is forbidden to use the spindle motor without sufficient cooling water.
3. During the storage and transportation of the water cooled spindle motor, the state of the high-speed grease inside the bearing will change; hence, the customers should run the spindle motors at a low speed before use.
