

JINAN HONGYANG CNC MACHINERY CO., LTD

HQD 800W (Φ62*210) Woodworking Advertising Water-Cooled Spindle Motor

 	Model:	GDZ-26
	Dimensions:	Φ62*210ΦM/M
	Rotating Speed:	40000RPM
	Power:	0.8KW
	Voltage:	220V
	Frequency:	670HZ
	Bearing:	FOUR BEARINGS
	Cooling Method:	WATER COOLING
	Chuck Nut:	ER11A
	Current:	6.5A

1. Similar to other [water cooled spindle motor](#) in this series, this water-cooled motor should also be used with the inverter. The specifications and parameters of the inverter should match the related parameters of the spindle motor. If the settings are incorrect, the spindle motor may get burned.
2. Before using, the water-cooled spindle motor must ensure that the cooling circulation system is working normally. It is forbidden to run the water-cooled spindle without the cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change, and the customer should run in at a low speed before use.
