

JINAN HONGYANG CNC MACHINERY CO., LTD

Huajiang 3.2KW Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控® HONGYANG CNC</p>	model:	100 3.2KW ER20
	Dimensions:	Φ100*220Φm/m
	Rotating speed:	24000RPM
	power:	3.2KW
	Voltage:	220V/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER20
	Current:	/

1. Spindle motor should be used with the inverter. The specifications and parameters of the inverter should match the parameters of the spindle motor. If the settings are incorrect, the spindle motor will be burned.
2. Before using, the water-cooled spindle motor must ensure that the cooling circulation system is working normally, and it is strictly prohibited to use the spindle without sufficient cooling water.
3. During the storage and transportation of the water cooled spindle motor, the state of the high-speed grease inside the bearing may change. Thus, it is better for the customers to run the water-cooled spindle motor at a low speed before its first use.
